Professional Summary

Full Stack Developer and Python enthusiast with hands-on experience building scalable, production-deployed web applications using ASP.NET Core, React.js, TypeScript, and SQL Server, alongside a strong foundation in machine learning and AI-integrated application development. Proficient in Python and its data science ecosystem including NumPy, Pandas, Scikit-learn, and Matplotlib. Skilled in developing RESTful APIs, implementing role-based access control, integrating LLM pipelines, and deploying ML models through web interfaces. Passionate about writing clean, maintainable code and applying artificial intelligence to solve real-world problems.

Technical Skills

Programming Languages: Python, C#, JavaScript, TypeScript, HTML, CSS

AI/ML Libraries: Scikit-learn, LightGBM, NumPy, Pandas, Matplotlib, Seaborn, RapidFuzz

AI/LLM Integration: Groq API, Pollinations AI, Generative AI, Prompt Engineering, Agentic AI, Loop Engineering

ML Concepts: Supervised Learning, Gradient Descent, Random Forest, Entity Matching, Model Evaluation

Cloud & Analytics: AWS (S3, SageMaker, IAM), Google Analytics 4 (GA4), Google Tag Manager (GTM), Algolia Search

Python Frameworks & Tools: Django, Flask, Tkinter, Jupyter Notebook, speech_recognition, pyttsx3

Web Frameworks & Libraries: ASP.NET Core Web API, React.js, Angular, Entity Framework Core, Material UI

Databases: SQL Server, MySQL, PostgreSQL, MongoDB

Tools & Technologies: REST APIs, JWT Authentication, Swagger, Postman Visual Studio, VS Code, Git, GitHub, Vercel, Render

Concepts: RBAC, Dependency Injection, OOP, MVC, CRUD, Debouncing, Microservices, Async Background Services

Operating System: Windows

Experience

MagnusMinds IT Solution Aug 2026 – Present

Software Engineer Intern *Ahmedabad, Gujarat, India*

- Working as a full-time on-site Software Engineer Intern, contributing to production web applications using Angular.js with a focus on building responsive, component-driven UIs.
- Integrated Algolia Search to enable fast, scalable product and content discovery, and implemented Google Analytics 4 (GA4) with Google Tag Manager (GTM) for user behaviour tracking and event-based analytics.
- Developed strong debugging and error-solving skills by diagnosing and resolving front-end and integration issues across development and staging environments.

Knovos India Pvt. Ltd. Jan 2026 – Apr 2026

.NET Developer Intern *Gandhinagar, India*

- Developed a production-grade Web-Based Collaboration Portal using ASP.NET Core, React.js, and SQL Server, implementing folder management, document handling, and REST API integration.
- Implemented role-based access control (RBAC) and JWT authentication to enforce data security and access policies across user roles.
- Built an activity logging system with React-based dashboards featuring filtering and pagination, integrated with REST APIs for real-time action tracking.
- Wrote and optimized SQL Server queries for document retrieval, version tracking, and user activity reporting.

Certifications

Python for Data Science – NPTEL

Supervised Machine Learning: Regression and Classification – Coursera (Stanford University / DeepLearning.AI)

GenAI Powered Data Analytics – Forage

Career Edge – TCS iON

Projects

LifeSync AI | ***React, TypeScript, Three.js, ASP.NET Core 10, EF Core, SQL Server, Python (FastAPI), JWT, Vercel, Render***

- Deployed a production full-stack AI wellness platform with a React/TypeScript frontend (Vercel) and ASP.NET Core 10.0 Web API (Render), featuring a multi-design UI architecture with modern design patterns and immersive Three.js 3D animations for an engaging user experience.
- Integrated a hybrid ML system calling a Python FastAPI Random Forest microservice with a C# Gradient Descent Solver fallback, and Pollinations AI LLM with real-time user metrics in the system prompt; reduced API calls by 85% via React debouncing.
- Built async PDF reports using PdfSharp and ASP.NET Hosted Services, implemented secure OTP email delivery via Brevo/SendGrid, and added a self-healing C# database seeder that auto-migrates schema changes on startup. Currently developing new features.

Web-Based Collaboration Portal | ***ASP.NET Core, React.js, SQL Server, JWT***

- Built a full-stack secure document and folder management portal with REST API integration, RBAC, document versioning, and a responsive React.js frontend.
- Developed audit dashboards with filtering and pagination for real-time visibility into all user actions and system events.

Mental Health Analyzer | ***Python, React.js, Node.js, MongoDB, Groq API***

- Built a full-stack AI-powered mental health platform with an LLM chatbot via Groq API for real-time personalized suggestions and stress management support.
- Implemented sentiment-based mood tracking to detect stress levels and trigger context-aware SOS alerts, coping suggestions, and interactive wellness activities.

Stock Predictor Application | ***Python, Django, Scikit-learn, Pandas, NumPy, Matplotlib***

- Developed a supervised ML stock price prediction system using Scikit-learn with data preprocessing and feature engineering via Pandas and NumPy.
- Integrated Polygon real-time market API for live data and deployed predictions through a Django web interface with Matplotlib-based trend visualizations.

Personal Voice Assistant | ***Python, speech_recognition, pyttsx3, pywhatkit***

- Built a Python voice assistant with natural language command processing, supporting YouTube playback, Wikipedia search, joke generation, and real-time clock updates.

ReactiveNews App | ***React.js, NewsAPI***

- Built a React.js news aggregator with category filtering, infinite scrolling, and API state management using React Hooks for a smooth user experience.

TextUtils Web App | ***React.js***

- Developed a React.js text utility with case conversion, word/character count, clipboard copy, and a fully responsive design.

Education

LDRP Institute of Technology and Research — Gandhinagar, Gujarat
Bachelor of Engineering in Computer Engineering — *Sep 2023 – Jul 2026*

- Relevant Courses: Artificial Intelligence, Database Management Systems, Operating Systems, Software Engineering, Data Structures and Algorithms, Computer Networks

The Maharaja Sayajirao University of Baroda — Vadodara, Gujarat
Diploma in Computer Engineering — *Mar 2020 – Jul 2023*

- Relevant Courses: Data Structures, Network Security, Web Development, Object-Oriented Programming

Participation & Achievements

Amazon ML Challenge 2026 | ***Python, LightGBM, RapidFuzz, AWS S3 / SageMaker / IAM***

- Participated in Amazon's 72-hour national-level ML hackathon, tackling a large-scale entity matching challenge to identify duplicate product listings across massive e-commerce datasets.
- Built an end-to-end ML pipeline using LightGBM for gradient boosting and RapidFuzz for fuzzy string similarity, applying feature engineering and model evaluation (Precision, Recall, F1 Score) to optimize matching accuracy.
- Leveraged AWS services (S3 for dataset storage, SageMaker for model training, IAM for access management) and explored agentic AI patterns for automated data processing.

Continuous Learning & Development

Self-Directed Learning & Independent Projects Jul 2026 – Present

Python, AI/ML, ASP.NET Core, React.js *Remote*

- Continuing to build and deploy personal projects in Python, AI/ML, ASP.NET Core, and React.js to deepen practical skills beyond the degree curriculum.
- Actively exploring advanced machine learning techniques, LLM integrations, and cloud deployment to prepare for industry roles in software and AI development.
- Developing new features for LifeSync AI and other live applications, applying best practices in clean code, API design, and full-stack architecture.
